GE Appliances, a Haier company (GEA) is announcing a voluntary recall to inspect certain models of freestanding and slide-in ranges. In some homes, the ranges could tip-over if a heavy weight is placed on an open oven door, posing a risk of burn injuries from hot food or liquids in cooking containers. No injuries or incidents have been reported. GEA is taking this action in an abundance of caution and as part of our commitment to product safety.

WHAT CONSUMERS SHOULD DO:

To schedule a free in-home inspection and repair (if needed) by a GEA service technician, contact GEA by visiting <https://www.geappliances.com/ge/recall/> or calling toll-free at 877-247-9770 between 8 a.m. to 5 p.m. ET Monday through Friday.

If you currently have a GE or related Brand Range, do not place any objects on the open oven door until the existing anti-tip bracket on your GE Range has been inspected.

Sincerely, GE Appliances, a Haier company
