TROUBLESHOOTING

While Dash products are durable, you may encounter one or more of the problems listed below. If the issue is either not solved by the solutions recommended below or not included on this page, please contact our Customer Support team at 1-800-898-6970 or support@bydash.com.

ISSUE	SOLUTION
The light on the MultiMaker™ keeps shutting off.	This is normal. During the cooking process, the heating element will automatically turn on and off to regulate the temperature and ensure that the Removable Plates do not get too hot or cold. When this occurs, the Indicator Light turns on and off.
How do I know when the MultiMaker™ is heated and ready to use?	When the MultiMaker™ reaches the optimal temperature, the Indicator Light shuts off and that means it's ready to get cooking!
There is no On/Off Button. How do I turn the MultiMaker™ off and on?	To turn on, simply plug in the power cord. When finished cooking, turn off the MultiMaker™ by unplugging it.

TROUBLESHOOTING

ISSUE	SOLUTION
When using the MultiMaker™, the Cover gets very hot. Is this normal?	Yes, this is completely normal. When using the MultiMaker™, always lift and lower the Cover by the Cover Handle. To prevent personal injury, DO NOT lift the Cover with your arm positioned over the Removable Plates. They are hot and may cause injury.
After using the MultiMaker™ a few times, food is starting to stick to the surface. What is happening?	There is probably a build-up of burnt food residue on the Removable Plates. This is normal, especially when cooking with sugar. Allow the appliance to cool fully. Then, use a damp, soapy cloth to wipe down the Plates. Thoroughly rinse the cloth and wipe again. If any food remains, apply a small amount of cooking oil and let sit for 5-10 minutes. Then scrub with a sponge or soft-bristled brush to dislodge food.
The Indicator Light will not turn on and the Removable Plates are failing to heat.	<ol style="list-style-type: none">1. Ensure that the power cord is plugged into the power outlet.2. Check to make sure the power outlet is operating correctly.3. Determine if a power failure has occurred in your home, apartment or building.
